**Eliminate Allergy to breath easy**

# Trustful Allergic Rhinitis Combination....

## Levocetirizine Hydrochloride 5 mg.

is an antihistamine used to relieve allergy symptoms such as watery eyes, runny nose, itching eyes/nose, and sneezing. It is also used to relieve itching and hives. It works by blocking a certain natural substance (histamine) that your body makes during an allergic reaction.

## Montelukast 10 mg.

Montelukast is used regularly to prevent the wheezing and shortness of breath caused by asthma . This medication can help decrease the number of times you need to use your rescue inhaler. This medication is also used to relieve symptoms of hay fever and allergic rhinitis.

# Provides power Against Allergic Disturbances

Provides Anti – Allergic and Anti – Inflammatory effects

Controls early as well as late phase of all allergic rhinitis

Superior control of nasal congestion & Decrease total nasal resistance

**CORYL-LM**  
Tablets

Advocated for...

**Nasal Congestion**

Nasal congestion is the blockage of the nasal passages usually due to membranes lining the nose becoming swollen from inflamed blood vessels

**Perennial Allergic**

Perennial allergic rhinitis is a chronic allergic condition that doesn't subside throughout the year and causes nasal congestion and a runny nose. You may feel like you have a permanent cold that won't go away

**Seasonal Allergic**

sometimes called "hay fever" or seasonal allergic rhinitis, are allergy symptoms that happen during certain times of the year, usually when outdoor molds release their spores, and trees, grasses, and weeds release tiny pollen particles into the air to fertilize other plants.

**Allergic Asthma**

Allergic asthma is asthma caused by an allergic reaction. It's also known as allergy-induced asthma. You may have allergic asthma if you have trouble breathing during allergy season.
